Student Handbook Directory 2016-17

Olin College
of Engineering

Environmental Responsibility

Olin College is making an effort to be environmentally responsible with regard to our printed publications.

The *Community Directory* utilizes a font which allows a substantial amount of text to fit on each page, keeping the book to as few pages as possible without compromising readability and functionality.

We do not laminate the cover, as most lamination materials are not recyclable. We utilize digital printing, to eliminate film and printing plates.

The text and cover papers are manufactured using biogas energy. Gas, produced from the decomposition of waste in a landfill, is transported to the mill and used in the paper making process. Using this green energy substantially reduces greenhouse gas emissions.

The paper contain 100% post-consumer recycled fibers, and is certified processed chlorine free.

This paper holds certification from Environment Canada's Environmental Choice Program, which identifies environmentally friendly products. Criteria are greenhouse gas emissions, water and energy resources consumption and use of recycle fiber. The paper manufacturer is the only Canadian fine paper manufacturer that has been certified.

Volume 2 2016-17

Cover photo: by Sara Hendren, Assistant Professor of Design. Dancer and choreographer Alice Sheppard, demonstrating the physics of dance to students of mechanics and bio-mechanics.
